PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience building end-to-end web products. Specialized in Next.js, React, TypeScript, and Node.js, with hands-on experience deploying infrastructure on AWS (S3, CloudFront, Lambda, API Gateway, Cognito) and Vercel, and automating CI/CD pipelines. Comfortable acting as the direct technical counterpart to clients and stakeholders, translating business needs into product and architecture decisions. I complement my stack with Python, NestJS, and Go for backend services, and integrate AI APIs (OpenAI, Claude) into full stack products.

TECH STACK

Frontend: Next.js, React, TypeScript, Redux, TailwindCSS, i18next, Webpack, HTML5, CSS3

Backend: Node.js, Express, NestJS, Python (Flask), Go, .NET / C#, REST APIs, PHP (Kohana)

Cloud & DevOps: AWS (S3, CloudFront, Lambda, API Gateway, Cognito, DynamoDB), Vercel, CI/CD, Docker

AI & APIs: OpenAI API and Claude API integration

Data & Automation: Python (scraping, ETL), BeautifulSoup, Requests, Pandas, data normalization

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis

Languages: JavaScript (ES6+), TypeScript, Python, Go, C#, PHP, SQL

Testing & Quality: Pytest, Jest, Code Reviews, Clean Code, TDD

Methodologies: Agile/Scrum, Git/GitHub, Scalable Architecture, Product Mindset

PROFESSIONAL EXPERIENCE

Full Stack Developer (Freelance) — *Independent* — *Remote, Chile*

Jan 2026 – Apr 2026

- Built and maintained custom web applications for clients, leading projects end-to-end from requirements gathering to production deployment.
- Designed and delivered internal platforms and full stack solutions tailored to diverse business needs, prioritizing scalable architecture and code maintainability.
- Self-directed deep dive into NestJS, event-driven architecture, asynchronous processing with queues, and AI API integration (OpenAI, Claude), materializing this learning into production-ready personal projects.

Full Stack Software Developer — *Anguita Osorio* — *Las Condes, Chile*

Dec 2022 – Dec 2025

- Led the migration of the corporate website from React to Next.js, defining architecture, rendering strategy (SSR/SSG), and project structure, reducing load times by ~40%.
- Acted as the direct technical counterpart to internal client Gurbana, proposing, prioritizing, and challenging solutions; translated business requirements into product and architecture decisions without the need for an intermediary PM or designer.
- Designed and implemented serverless AWS infrastructure (S3 + CloudFront + Lambda + API Gateway + Cognito) for 3 production applications, achieving high availability and granular cache control.
- Set up CI/CD pipelines that automated 100% of deployments, eliminating manual errors and reducing delivery time from hours to minutes.
- Modernized multiple frontend applications by adopting TypeScript and clean code patterns, improving maintainability and reducing production bugs.

- Maintained and evolved legacy backend systems in PHP (Kohana), integrating new APIs and ensuring operational continuity of critical production systems.
- Participated in strategic technical decisions alongside leadership, defining development standards and the team's technological direction.

Junior Software Developer — *Juan Carlos Stephens Customs Agency — Valparaíso, Chile* Aug 2022 – Nov 2022

- Developed internal solutions in JavaScript and PHP used across multiple operational platforms, streamlining workflows and reducing manual work for the team.
- Designed and optimized SQL queries on relational databases, improving response times for operational reports.
- Applied development best practices, prioritizing reliability and code maintainability.

Software Developer Trainee — *Dual Vision Cognitive — Santiago, Chile* Nov 2021 – Feb 2022

- Built full stack applications with Python (Flask) and React, contributing to real projects in a collaborative agile environment.
- Implemented backend and frontend features, integrating REST APIs with a focus on best practices.
- Gained hands-on experience in web architecture, the professional development lifecycle, and distributed teamwork.

PROJECTS

I maintain an active portfolio where you can explore the projects I've worked on in detail — code, architectural decisions, and live demos. Feel free to visit it through the link in this CV's header.

EDUCATION

Computer Engineering (Ingeniería en Informática) — *Duoc UC, Viña del Mar* Mar 2023 – Present

Associate Degree in Computer Science — *Universidad Técnica Federico Santa María, Valparaíso* Mar 2020 – Apr 2022

LANGUAGES

Spanish: Native • **English:** Intermediate (advanced technical reading, fluent written communication)
